PROFESSIONAL SUMMARY

B.S. Computer Science student at KIET (CGPA 3.6/4.0, expected June 2027) with industry experience progressing from AI/ML Intern to Junior AI/ML Developer. Builds Python applications, computer-vision workflows, and full-stack tools that call LLM APIs and deliver results through REST-backed interfaces. Comfortable moving between model evaluation, API integration, and frontend/backend implementation.

TECHNICAL SKILLS

Programming: Python, JavaScript, Java, C#
Backend & APIs: Django, Node.js, REST APIs, API integration
Frontend: React.js, HTML, CSS
AI / ML: scikit-learn, Pandas, NumPy, PyTorch, computer vision, image classification, LLMs, Gemini API, LangChain, RAG
Tools & Platforms: Git, GitHub, Postman, Google Cloud / Vertex AI, n8n
Data & Storage: SQL, MySQL, Chroma

PROFESSIONAL EXPERIENCE

Thriftops By SwagKicks — Karachi, Pakistan
Junior AI/ML Developer — January 2026 – April 2026

- Developed React.js dashboard components and Node.js functionality integrated with REST APIs.
- Integrated AI model outputs into product workflows and evaluated computer-vision model results.
- Retrained damage, component, and angle image-classification models using Google Vertex AI.
- Contributed to product-related AI workflows and model-review functionality.

AI/ML Intern — November 2025 – December 2025

- Built a sample React.js dashboard for product/model review and testing.
- Documented workflows for model downloads, local testing, and on-device inference.
- Supported AI model evaluation and product workflow development.

Elevvo — Remote
Machine Learning Intern — September 2025

- Used Python and scikit-learn for data cleaning, preprocessing, model training, hyperparameter tuning, and evaluation.
- Handled missing values, outliers, and categorical encoding; evaluated model performance.

SELECTED PROJECTS

Explain Like I'm a Bot — *React.js, Django, Gemini API*

- Built a full-stack app with a React frontend and Django JSON API that calls Gemini for persona-based explanations.

Support Ticket Triage Desk — *Python, LangChain, Chroma, Qwen, RAG*

- Built a retrieve-then-generate workflow that pulls ticket/policy evidence from Chroma and returns evidence-grounded structured JSON.

Job Aggregator Automation — *n8n, Groq, REST APIs, Google Sheets, Gmail*

- Built an n8n workflow that collects job listings, drops duplicates, scores relevance with Groq, logs results to Google Sheets, and sends Gmail when an application email is present.

EDUCATION

B.S. Computer Science | KIET University, Karachi — Expected June 2027
CGPA 3.6/4.0 | Currently sixth semester

CERTIFICATIONS

- Introduction to AI and Machine Learning — Google Cloud / Coursera, 2025
- Deep Learning for Beginners — Simplilearn SkillUp, 2026
- Data Analytics Job Simulation — Deloitte / Forage, 2026
- Python (Basic) — HackerRank, 2025
